Imsaak is the time when all eating and drinking must stop. Its time is estimated to be 20 minutes before Fajr.

Fajr is calculated by subtracting 80 minutes from the time of sunrise.

Zuhr is calculated by adding 10 minutes to the sun's transit point time.

Maghrib is calculated by adding 10 minutes to the time of sunset.

* The beginning of Ramadhaan is based on the moon's sighting. This is the most likely beginning date.
